**Brief Description of Arguments to be Presented:**

In claim 1, "perpendicular" will be deleted before "distances". With  
claim 1, then calling for the distances between the planar portions of the  
opposite faces being substantially equal, claim 1 distinguishes over  
Scheiwiller '827, in which the distances are not even close to being equal.  
An interview was conducted on the above-identified application on \_\_\_\_\_.

**NOTE:**

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

(Page 2.)

Brief Description of Arguments to be Presented (cont):

It is pointed out that the distances between opposed faces of the Scheiwiller '827 are too different from one another to be considered, in the terms of claim 1, "substantially equal". In the case of *In re Faunce*, 24 USPQ 251 (1935), the CCPA stated that "substantially equal proportions" means that, although the proportions may vary slightly, neither will appreciable predominant. That case involved a medicinal preparation. In the Scheiwiller stones, one dimension predominates over the other two, or two dimensions predominant over the third. In *National Research Development Corp. v. Great Lakes Carbon Corp.*, DC Del., 1975, the court found that "substantially" in a claim is used to prevent avoidance of literal infringement by minor changes that do not cause a loss of the invention's benefit. The dimensions of the Scheiwiller '827 stone are sufficiently different from one another that the stone does not enjoy the benefit of the block of the present invention. More specifically, the Scheiwiller '827 stones are not formed so that each of the faces can be used as a horizontal upper face at the same height.
